

Presenter List in Poster Session (Final)

2017/11/15 (Wed.) 14:10-14:50 Room#3 Poster Session		
A-005	Liu Chen-hui	Interactive prediction of airport noise monitoring data based on time-series similarity
A-010	Xie Hua	Research on the Measure and Division of the Busyness Level of Airspace Waypoints
I-012	Ying Peng	Dynamic En-route Diversion Approach under Convective Weather
A-030	Hironao Takahashi	Design of Domain Specific Ontology to Avoid Miscommunication between Pilots and Ground Control Operator
A-054	Zengxian Geng	Research on the architecture of UAV-ATM information platform based on mobile 4G network
A-057	Akihiro Motodani	Prediction of Flight Time Uncertainty for 4D Trajectory Management
A-068	J. Liu	Online Trajectory Prediction through Updating Aircraft Position and Aircraft Intent
A-069	X. M. Dai	Integrated Arrival & Departure Aircraft Sequencing under the Influence of Sequential Flights
I-089	K. Glagovskiy	Ground and on-board ATM procedures prototyping tools
